Assembled
in under
2 minutes!

We only have one
Planet!

With up to 80% less Particulate Matter emissions than an equivalent chipboard coffin, Our cardboard caskets offer a viable solution for crematoriums which are facing increased pressure to adhere to and abide by international emission standards

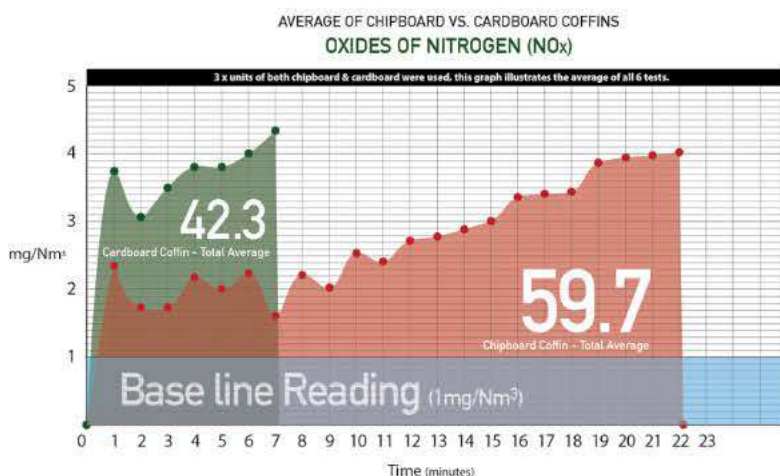

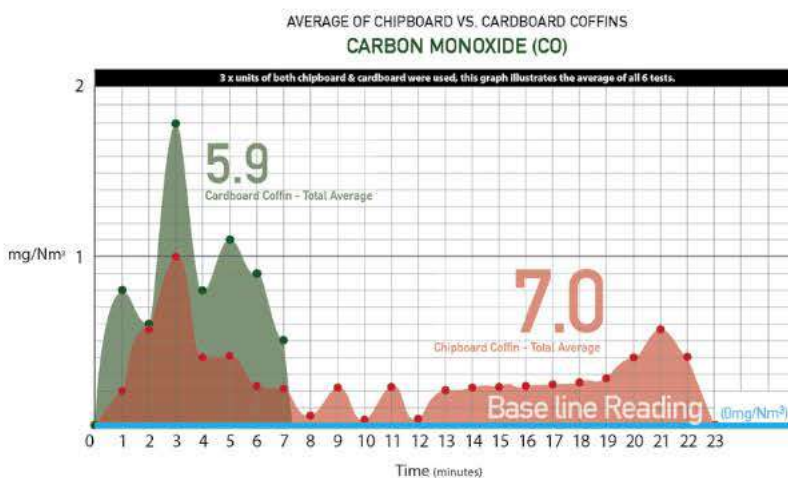

15,8% less Carbon Monoxide(CO)
3,50% Nitrogen Oxide(NO)
29,1% less Oxides of Nitrogen (NOx)
80,2% less Particulate Matter

PRODUCT TESTING

We put our caskets up against the most eco-friendly, non-laminated and rope handled chipboard counterpart. This is important to note, as comparative emission results would increase dramatically if we had used a more conventional laminated and handled chipboard coffin, but our aim was to be as fair as possible and to give chipboard coffins the best possible results.

Tests were done with corpses earlier in the year, but we wanted to take it a step further and eliminate any irregularities and any possible external factors. We compared apples with apples, ensuring we get the most accurate real life comparison possible. So under identical scenarios at a consistent set temperature, we had an independent emissions testing company test 3 x 2 of each type of caskets.

The results confirmed all previous tests & recordings. We are leaders in ensuring a greener tomorrow, one coffin at a time!

NOW EQUIPED WITH SELF-LOCKING CLIPS

Our cardboard caskets now use specialized self-locking clips that make assembly time even faster and easier. In the pack of caskets will be a packet of 12 Self-locking Clips = 4 clips per coffin. 2 cable ties are still provided to secure the lid for transport convenience.

A PRACTICAL & AFFORDABLE, FLAT-PACKED COFFIN FOR SA FUNERAL HOMES.

Get all the benefits of our super strong flat-pack coffin. Now with our NEW "enclosed lid design", Whether it be for cremation or burial purposes, here are some of the benefits why undertakers are choosing our product:

- Economically priced
- Flat-packed, super light weight & easy to move.
- Easy to store large quantities without taking up storage space.
- Store 33 coffins in just over one SQM floor space.
- Easy to move flat-packs of three or 33 coffins palletised.
- Assemble and ready to use in under 2 minutes.
- A standard 100 micron plastic liner pre-installed.
- Specialised one-way clips retaining a virtual air tight seal.
- Robust enclosed lid suitable for burial and cremation.

With the shortage of coffins nationwide, take this opportunity to contact us for more information on just how efficient and seamless the ordering and delivery process is to ship our flat-pack coffins nationwide - **right to your door!**

Not only offering prompt stock supply, but also saving floor space for storage. See why our top quality, budget friendly coffins are a worldwide success!

CARDBOARD CREMATION CASKETS

Budget-constrained families today are looking for a more affordable solution to say goodbye to their loved ones. Our caskets deliver on both price, environmental and safety performance metrics:

EARTH FRIENDLY

98% Biodegradable & compostable

REDUCE FUEL COSTS

Save up to 60% combustion fuel during the cremation process, as opposed to conventional MDF, chipboard & solid wood coffins.

REDUCE CREMATION TIME

Save up to 50% time during cremation per coffin as well as faster cooling of ashes due to no charcoal, no nails, screws or staples, which results further in reduced handling and processing time.

NO HARMFUL CHEMICALS

Contain no toxic adhesives that release formaldehyde into the environment as opposed to conventional chipboard coffins.

GREENHOUSE FRIENDLY

Release up to 75% less carbon emissions during the cremation process, as opposed to conventional chipboard & solid wood coffins.

RESPONSIBLY SOURCED

Use materials that are responsibly sourced, that adhere to sustainable forestry management.

SUSTAINABLE

Contain 70% less wood fibre than conventional coffins, saving trees.
