CREMATION CASKETS

ECOLOGICO™

Short assembly video available at www.ecologico.co.za

Assembled in under 2 minutes,
Ecologico caskets are supplied direct
to participating funeral homes and crematoriums around the world.
Now available with burial-friendly enclosed lid, boasting a strong, light weight stackable design.

ECOLOGICO FIBERBOARD CREMATION CASKETS

Budget-constrained families today are looking for a more affordable solution to say goodbye to their loved ones. Ecologico caskets deliver on both price, environmental and safety performance metrics:

EARTH FRIENDLY

Biodegradable & compostable

REDUCE FUEL COSTS

Save up to 60% combustion fuel during the cremation process, as opposed to conventional MDF, chipboard & solid wood coffins.

REDUCE CREMATION TIME

Save up to 50% time during cremation per coffin as well as faster cooling of ashes due to no charcoal, no nails, screws or staples, which results further in reduced handling and processing time.

NO HARMFUL CHEMICALS

Contain no toxic adhesives that release formaldehyde into the environment as opposed to conventional chipboard coffins.

GREENHOUSE FRIENDLY

Release up to 75% less carbon emissions during the cremation process, as opposed to conventional chipboard & solid wood coffins.

RESPONSIBLY SOURCED

Use materials that are responsibly sourced, that adhere to sustainable forestry management.

SUSTAINABLE

Contain 70% less wood fibre than conventional coffins, saving trees.

PACKING INFO

- 330 caskets per 20ft container
- 33 caskets per pallet
- 3 caskets wrapped in a flat-pack.

NEW WOODGRAIN CASKET AVAILABLE

We are excited to announce the all new printed woodgrain boxed lid design available with alternative eco-friendly rope handles

With up to 80% less Particulate Matter emissions than an equivalent chipboard coffin, Ecologico caskets offer a viable solution for crematoriums which are facing increased pressure to adhere to and abide by international emission standards

15,8% less Carbon Monoxide(CO)
3.50% Nitrogen Oxide(NO)
29,1% less Oxides of Nitrogen (NOx)
80,2% less Particulate Matter

PRODUCT TESTING

We put our caskets up against the most eco-friendly, non-laminated and rope handled chipboard counterpart. This is important to note, as comparative emission results would increase dramatically if we had used a more conventional laminated and handled chipboard coffin, but our aim was to be as fair as possible and to give chipboard coffins the best possible results.

Tests were done with corpses earlier in the year, but we wanted to take it a step further and eliminate any irregularities and any possible external factors. We compared apples with apples, ensuring we get the most accurate real life comparison possible. So under identical scenarios at a consistent set temperature, we had an independent emissions testing company test 3 x 2 of each type of caskets.

The results confirmed all previous tests & recordings. We are leaders in ensuring a greener tomorrow, one coffin at a time!

NOW EQUIPED WITH SELF-LOCKING CLIPS

Ecologico caskets now use specialized self-locking clips that make assembly time even faster and easier. In the pack of caskets will be a packet of 12 Self-locking Clips = 4 clips per coffin. 2 cable ties are still provided to secure the lid for transport convenience.
